

Meet the

BIOCONJUGATION
INSIGHTS

Editorial Board

An integral part of the team behind *Bioconjugation Insights* is our fantastic **Editorial Advisory Board** (EAB). The members of our EAB played a crucial part in launching the journal and continue to be essential for its success. They generously contribute their time and expertise to help shape our content and ensure we highlight the topics and authors most relevant to our audience.

We surveyed a selection of our EAB members to learn more about their careers, interests, and their visions for the exciting future of both the journal and the fields it serves.

the EdBoard in Numbers

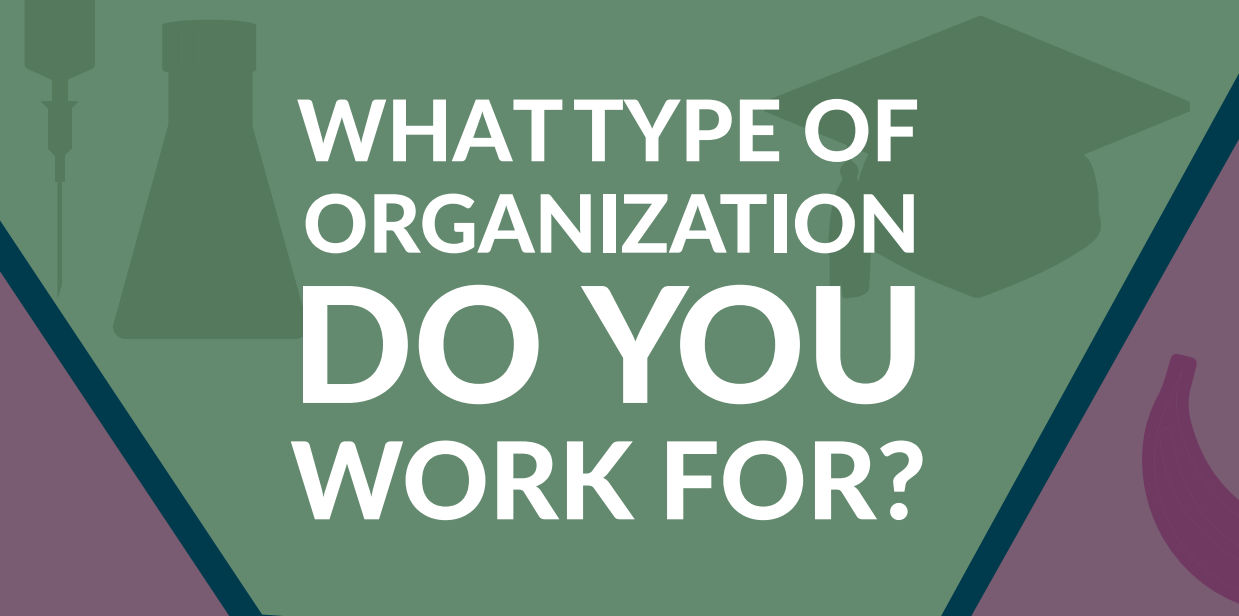

“Following the approvals of Trodelvy and Enhertu, the focus in ADC development has shifted from solely emphasizing efficacy to enhancing the therapeutic index. This transition aims to maximize anti-cancer activity while minimizing off-target toxicities, thereby improving patient outcomes.”
